

How do I deregister for a test/resit?

At Radboud Universiteit , when you register for a course, you are automatically registered for the first opportunity of the tests/examinations of the course.

If you do not wish to take part in the test, for example because it concerns a subtest that you already passed last year, you can deregister from the test concerned. Because a no-show can lead to the registration of a fail for non-participation.

- Please note: deregistering for tests is only possible if your student administration facilitates this, for example by setting a time period within which you can deregister (for tests, this is usually up to 5 days before the test date).
 - In specific cases, the instruction below will therefore not help you in deregistering for a test. In that case, contact your STIP or student administration.

Go to > Enrol

Then choose 'Show my registrations'
